Technical Session 4: Multibody Simulation  
September 30th, 2008

“Altair MBD Solutions – The Current Status and Future Directions”

Altair Engineering Inc.  
1820 E. Big Beaver Rd., Troy, MI 48083-2031, USA

Rajiv Rampalli  
Vice President of Software Development

Abstract:
Altair has substantial plans for developing best-in-class solutions in the area of system level simulation and multi-body dynamics. This presentation will provide an update on this issue. The key improvements in latest releases of MotionSolve and MotionView will be examined. This will be followed by a review of the guiding principles that drive the development of new solutions in the system-level simulation arena. Finally, the presentation will review future directions for MBD software development.
